Forecast for Thursday 24 Oct 2024

Weather: A mainly dry day, just the odd spot of drizzle mainly over southern areas. Mostly cloudy but some bright or sunny intervals should break through mainly over northern ranges and foothills in the afternoon. Some showery rain is possible towards midnight.

Chance of cloud-free hill tops above 800m: 30% at first rising 70%, but higher in the north. Chances falling again after dark.

Low cloud and visibility: Mainly cloudy in the south and over central fells, with cloud down to 450-600m at first lifting to 750-900m in afternoon. The cloud more broken or scattered in the north with better chance of clearances. Away from the cloud visibility will be good.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View
Despite a mild southerly airflow for this time of year, there will be a significant windchill effect at higher levels

Forecast for Friday 25 Oct 2024
Weather: A cloudy day with the chance of some rain, a low risk of some heavier outbreaks.

Maximum wind: Southeasterly 20 gusts 30mph

Chance of cloud-free hill tops above 800m: 40% best chance in the afternoon.

Low cloud and visibility: Fairly extensive cloud at 600-900m with perhaps some lower banks in the south and east. There is a chance of a brighter spell in the afternoon but detail of cloud uncertain. Visibility below cloud, moderate at first becoming mainly good in drier spells but should heavier rain occur it would fall to poor.

Temperature: **Valleys:** Plus 10 rising to Plus 15 Celsius
At 800m: Plus 9 Celsius
Freezing level: Above summits
